[LinkedIn Profile](#) | [GitHub Profile](#)

Motivated tech and finance student with interests in cybersecurity and data analytics. Experience with analytical thinking, project management, strong team skills, time management, and efficient verbal and written communication.

## TECHNICAL SKILLS:

Front End: HTML5, CSS, jQuery, JavaScript, Bootstrap, AJAX

Back End: Node.js, Express, MySQL

## PROJECTS:

### **Masked Wanderer** | [GitHub Repo](#) | [Deployed Site](#)

- This domestic travel application provides discounted flight details and updated COVID-19 data for travel destination.
- The application allows users to be informed on real-time COVID-19 infections in the state they wish to travel to.
- We used HTML5, CSS, jQuery, JavaScript, Bulma, and AJAX to create our application.

### **Financial Analysis of Merck and Pfizer** |

- Using the public 10-K's of each company, we analyzed each company by calculating key financial ratios.
- Our project highlights key line items from each financial statement and emphasizes trends and changes to each company.
- We used both time series and cross-sectional analysis to compare the two companies and articulate an investment decision.
- After my analysis I chose to invest in Pfizer whose stock rose for months in the time after our project.

## WORK EXPERIENCE:

### **Viking Construction | Blackhall Studios**

May 2020 – August 2020

*Administrative Intern*

Atlanta, GA

- Networked through fraternity alumni and assisted the VP of Viking Construction with various tasks throughout the summer.
- Created a system with Excel for logging employee's work time that started the process of billing the company's clients.
- Using QuickBooks, I had to sift through invoices to determine which to void or which needed payment or confirmation.
- This was an unpaid internship from Monday to Thursday, so I took a weekend job at a restaurant to make money for school.

## EDUCATION:

### **The University of Georgia** | Athens, GA

Graduation May 2021

*B.B.A in Finance*

GPA: 3.20 / 4.00

#### **Relevant Coursework:**

- |                                  |                         |                                    |
|----------------------------------|-------------------------|------------------------------------|
| • Financial Reports and Analysis | • Survey of Investments | • Business Modeling & Optimization |
| • Economics of Crime             | • Financial Management  | • Risk Management and Insurance    |

### **Georgia Institute of Technology** | Online

July 2020 - Present

*Certificate in Full Stack Web Development*

## ACCOMPLISHMENTS/AWARDS:

### **Business Modeling and Optimization:**

- Received a 104% final grade in this class where the average is usually an 85%.
- Excelled at using calculus and regression analysis in Excel to create business optimization models and interpreting results.

### **Survey of Investments:**

- Finished 2<sup>nd</sup> of 70 in a MarketWatch game where I turned \$100K into \$142K in 8 weeks of market trading.
- We were required to make at least 15 trades and take at least one new position each week while not allowing any one security to make up more than 15% of our portfolio.
